

Private Cloud Connect

Offered as a boost to our Cloud-ready Private Network (MPLS), Private Cloud Connect allows for secure connectivity breakout to businesses that need to connect to their third party Cloud service provider.

There's no need for business traffic to touch the public Internet. Private Cloud Connect supports various tariffs to meet the demand of your business and is wholly resilient delivering a better business experience.

Ideal for:

Businesses concerned about sensitive data which they wish to keep private and secure.

Multi-site businesses that need to share data.

Businesses that are looking to, or already invest in Cloud services.

Remote sites that need to ensure that critical reports are regularly transmitted or backups are always completed.

High Performance

Our Private Cloud Connect infrastructure keeps all business traffic within a secure, high performance environment between your Cloud-ready Private Network and the Cloud provider.

Secure

Private Cloud Connect ensures that any 'business' traffic is transmitted and received in a secure private environment and therefore does not touch the public Internet. By keeping traffic in a secure environment (your private network) Private Cloud Connect provides high availability for access to Cloud service providers.

Reduce Risk

Security risk is reduced when using Private Cloud Connect, as it allows you to access multiple Cloud service providers via one connection. With a connection to each service provider the security risk is higher.

Cloud Provider Compatibility

Private Cloud Connect provides onward connectivity to major Cloud service providers.

Unlock the Cloud

Using Private Cloud Connect and your chosen Cloud service provider, you can store data or host securely in the Cloud, for access from anywhere. This reduces the cost of locally stored data and allows for scalable solutions based on your changing business needs. The service is available across a number of tariffs to give you the bandwidth that meets your business growth requirements.

Resilience

Our Enterprise Grade resiliency for Private Cloud Connect delivers reliability of 99.99% up time, with a fully monitored service and automated switch failover to alternative ports which will deliver greater network and operational efficiencies.

About TalkTalk Business

TalkTalk Business is one of the UK's fastest growing B2B telecoms providers, offering a full range of business-grade communications products and services, spanning Connectivity and Networking, Hosted Solutions, Mobile, Voice and IP telephone systems. Our mission is to deliver what matters most to our 180,000+ business and public sector customers, and 800+ Partners, through consistently reliable, easy-to-use, innovative, great value solutions.

TalkTalk Business is truly innovative, looking for ways to disrupt the market and deliver value back to our customers. Following an investment of over £600m, we operate one of Britain's largest Next Generation Networks with 100% UK coverage, 95% on our network. We can deliver to over 3,000 exchanges, on-net for EFM and Fibre Ethernet, giving us circa 60% more local exchanges than BT.

With over 20 years' experience providing support to customers - from national retailers to sole traders - and with future-proof, scalable technology, and standout service, TalkTalk Business aims to empower you to connect to the things that matter most: your customers, employees and suppliers.
