

Ethernet over Fibre to the Cabinet

1 Customer site

Speeds of up to 20Mbps symmetrical, boostable to 80Mbps downstream at no extra cost.

2 Exchange connection

The length of copper used is reduced by only going to the street cabinet. A shared 1Gb connection to the exchange with guaranteed minimum speeds.

3 Connect to the network

The exchange is connected to our NGN allowing you to choose the circuit to be delivered into a Partners Layer 2 Interconnect, as part of an MPLS IPVPN solution or as an Internet Access circuit.
