

Ethernet

1 Customer site

A range of symmetrical product speeds available, with easy upgrade routes allowing you to choose the best bandwidth speed for your company and future-proofing your business for growth needs.

2 Exchange connection

The Ethernet line goes via our Ethernet switch in the exchange.

3 Connect to the network

The exchange is connected to our NGN allowing you to choose the circuit to be delivered into a Partners Layer 2 Interconnect, as part of an MPLS IPVPN solution or as an Internet Access circuit.
